

*With 17 versatile Reagent Kits -  
For any sample and target type!*

# MagPurix® 12A

**BELIEVE IN PURITY!**

## Automated Nucleic Acid Purification System

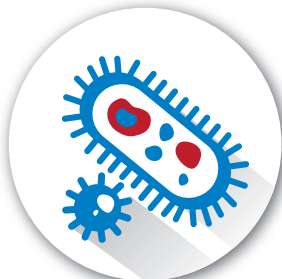

MagPurix®12A is an advanced high throughput extractor for the automatic purification of nucleic acids. It offers the flexibility to process 1-12 samples per run simultaneously, which meets your small to medium sample requirements.

- True Walk-Away Automation
- Easy-to-use Interface
- Advanced Magnetic Extraction Technology
- Consistent and reproducible results
- Cost-Effective and reliable
